ORCID

Connecting Research and Researchers

The University of Hong Kong Libraries

(Open Researcher and Contributor iD)

Sofia Maria Garcia Hernandez

ORCID ID

https://orcid.org/0000-0002-2771-9344

Your ORCID iD is a unique number which identifies you as a researcher.

Why Get An ORCID Identifier?

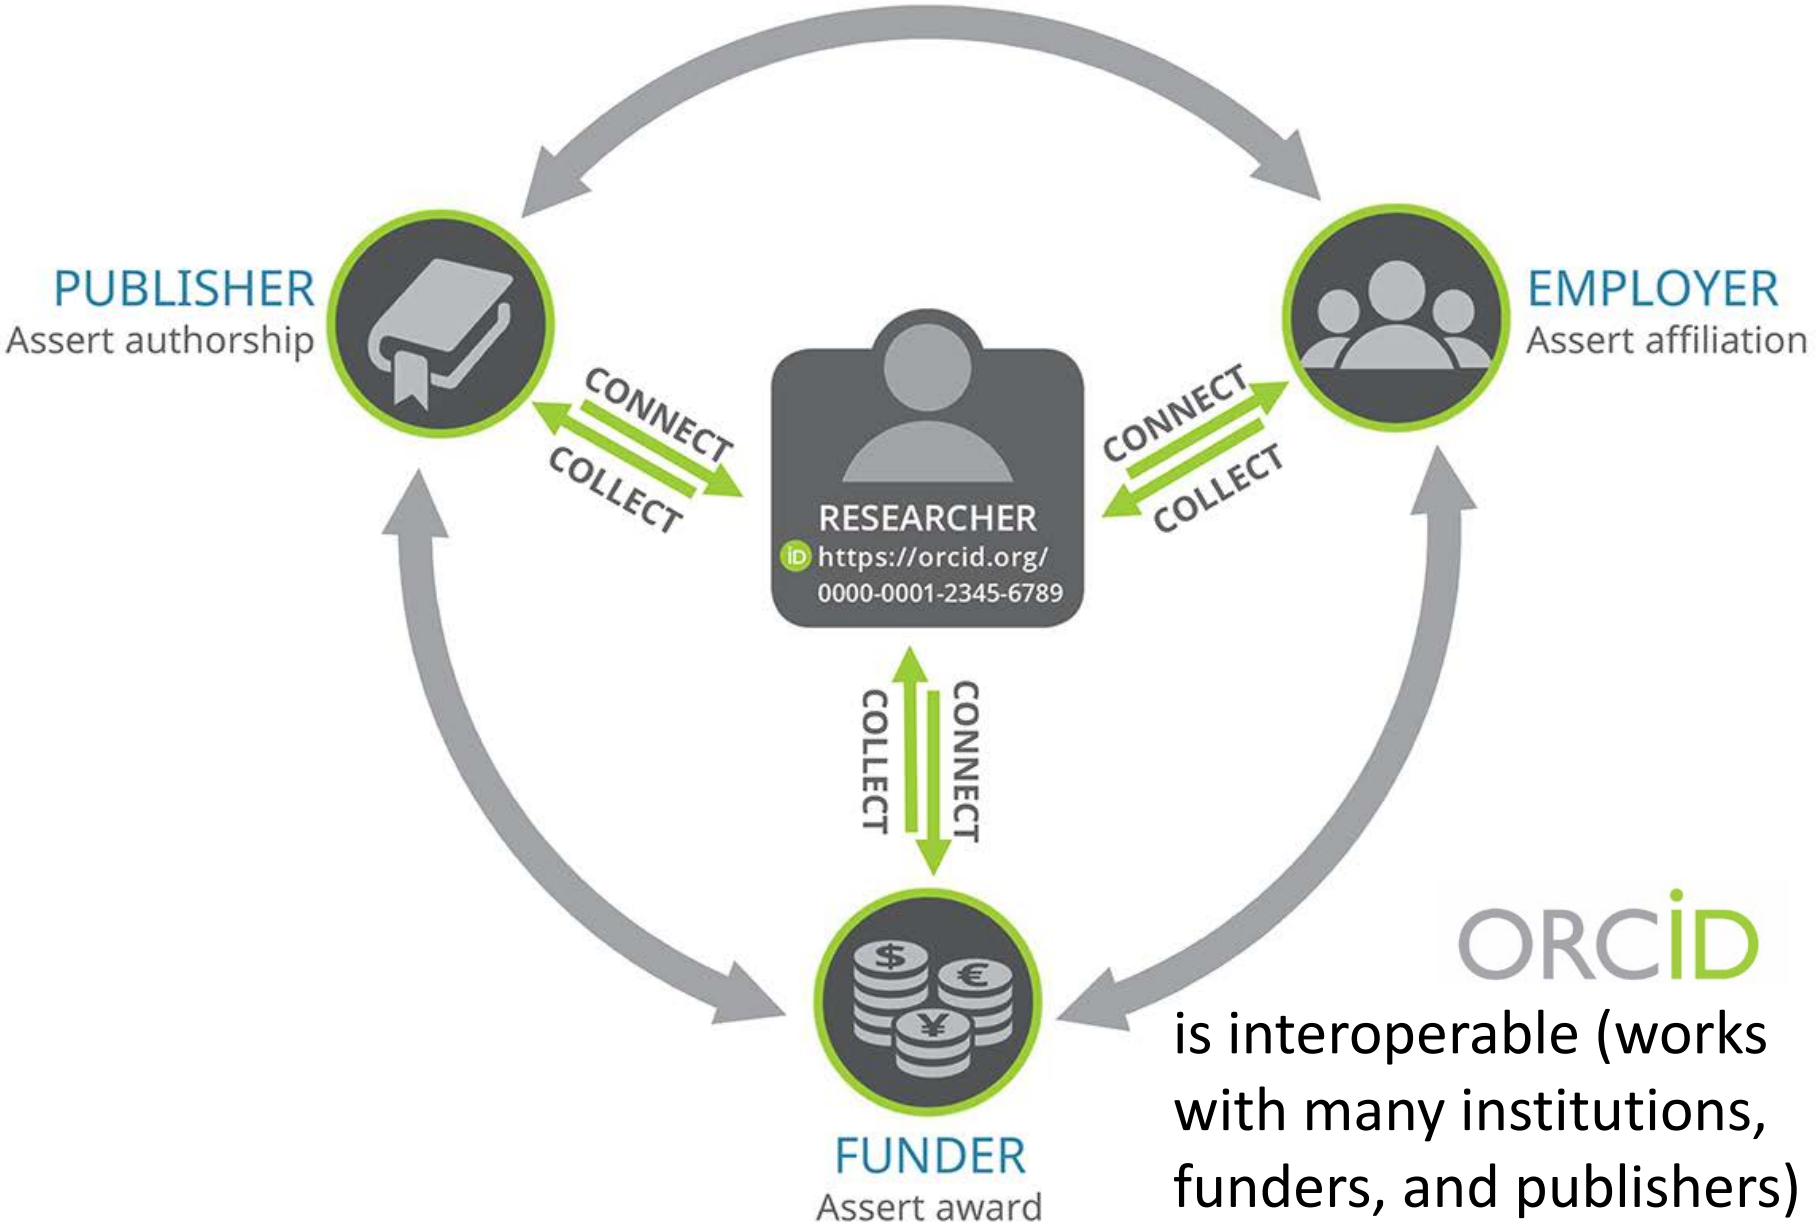
ORCID

- provides you with unique persistent identifiers (PID)s that distinguish you from other researchers
- ensures your research outputs and activities are correctly attributed to you
- improves recognition and discoverability for you and your research outputs

https://orcid.figshare.com/articles/The_Value_of_Using_Unique_Identifiers_for_Researchers/7653221

INTEROPERABILITY

ENTER ONCE
REUSE OFTEN



ORCID is interoperable (works with many institutions, funders, and publishers)

ORCID is portable and enduring

What's in a Name?

Most names are not unique

Many people have the same name

Names may change through marriage or other circumstances

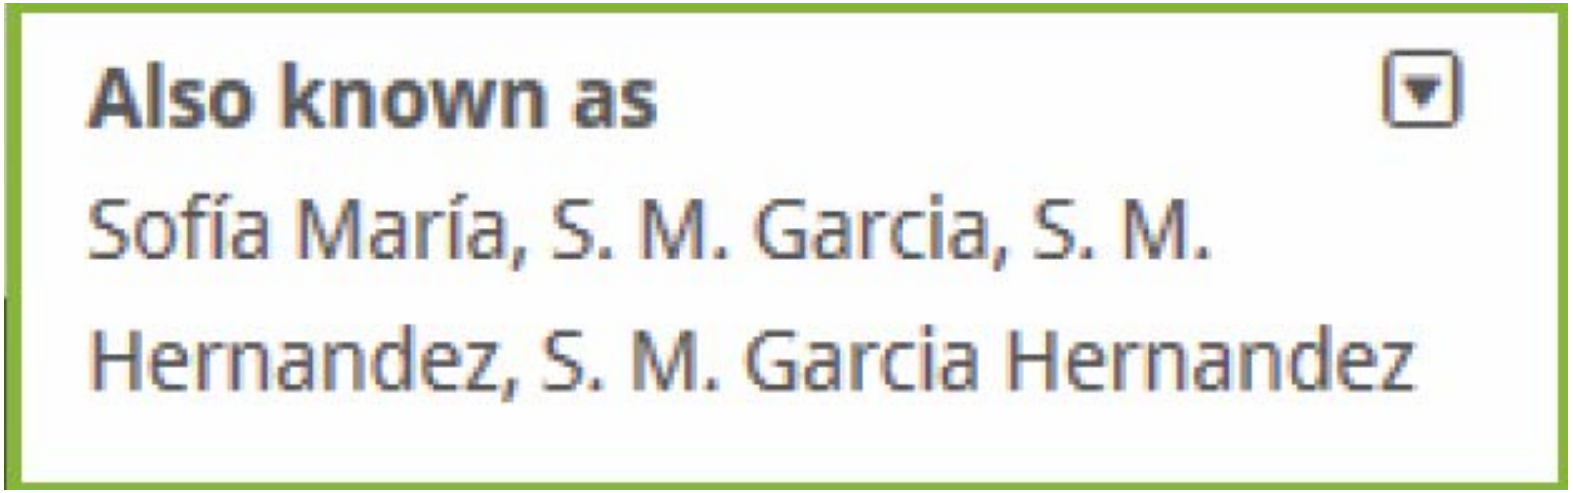
People use different versions of their name during their career

Individuals use different alphabets, abbreviations, or naming conventions

https://orcid.figshare.com/articles/The_Value_of_Using_Unique_Identifiers_for_Researchers/7653221

ORCID is portable and enduring

Your iD is yours throughout your career, no matter where you work, who funds you, whether your name or field of research changes, or if your name appears in different forms in different places, e.g.



The use of ORCID identification is already widely practised by many leading international journals and grant bodies.

What is ORCID?

ORCID is an international, interdisciplinary, open, and not-for-profit organization created in 2010 for the benefit of a range of stakeholders, including researchers, research organizations, research funders, and publishers. Springer and Nature Publishing Group were amongst the founders of ORCID.

ORCID Connecting Research and Researchers | Member Organization

An ORCID identifier (ORCID iD) is a unique, personal, persistent identifier for researchers that distinguishes them from every other researcher and enables them to link their publications to their unique record, ensuring their work is recognized.

Getting an ORCID iD is free and easy to do through the ORCID registration page: https://orcid.org/register

https://www.springernature.com/gp/researchers/orcid

Distinguish yourself with ORCID

ORCID iD is a unique and persistent identifier that distinguishes you from every other researcher and connects you to your research activities, so you always get the credit for your work.

Author Compliance Tool
Use our ACT to check the ORCID policy of your selected journal.

- Funders, institutions, and societies can easily identify you and your research
- You don't waste time entering repetitive data when reporting on your past activities
- Your professional activities are clearly linked back to you
- You can easily comply with funder mandates

ORCID and PLOS

Making Connections for Improved Discovery

ORCID at PLOS

PLOS was one of the original signatories to the publishers' ORCID open letter – together with The Royal Society, eLIFE, EMBO Press and Science journals – committing to implementation of this digital tool for improved discovery and recognition.

PLOS requires an ORCID iD for all corresponding authors at the time of manuscript submission and we encourage all users to have one. We display author ORCID iDs on published articles and blog posts – when authors provide them – to promote discoverability and credit. Our submission process is integrated with ORCID so that anything you publish with PLOS will include your authenticated ORCID ID.

Authorize Crossref and Datacite to automatically update your ORCID record. When Crossref or DataCite receives a citation with your ORCID, you'll receive a message in your ORCID inbox. Click the button to authorize Crossref or DataCite to write to your ORCID record. Your articles will appear on your ORCID record as soon as they are available online, without your having to make manual updates.

https://www.plos.org/orcid

The University Grants Committee (UGC) and Research Grants Council (RGC) has mandated the adoption of ORCID in the coming RAE 2020 exercise and in all RGC grant applications with effect from the 2019/20 funding exercise.

Research Grants Council Research Impact Fund 2019/20 Call Circular

Applications for Allocations from the Research Impact Fund for 2019/20

Matters Requiring Attention

May I draw applicants' attention to the following matters:

a. Provision of Open Researcher and Contributor ID (ORCID)

All local academics are required to submit a unique researcher ID, namely ORCID iD, in applications in all capacity under all research funding schemes administered by the RGC. Non-local academics in the capacity of Co-Principal Investigators (Co-PIs) are also encouraged to submit their ORCID iDs in the applications.

Budget

In 2019/20, the University Grants Committee (UGC) has reserved $75 million (exclusive of on-costs) for the RIF exercise. Mandatory matching funds are required from UGC-funded universities / partner(s) for approved projects on a 70% (RGC) / 30% (university / partner(s)) basis. The net amount of funding requested from the Research Grants Council (RGC) should range from $3 million to $10 million per project.

Auto-updates: time-saving and trust-building

ORCID Support
8 months ago · Updated

Follow

When you provide your iD and grant permissions to a trusted organization to add data to your record, part of the expectation is that the organization you are connecting to will continuously update your record with information that it can validate and share.

ORCID supports long-lasting permissions, allowing you to grant trusted organizations access to read and update your ORCID record for up to 20 years, or until you revoke permission from your account settings. The trusted organization uses these long-lasting permissions to continuously update your ORCID record with new information in its system. We call this **auto-update**.

Auto-updates are key to achieving the ORCID mantra of **enter once, re-use often**. They save you time and can increase trust in data by enabling the automatic exchange of information between research systems and ORCID records.

Auto-updates are not required. Just as you are in control of your ORCID record, you are also in control of whether you grant an organization permission to read or update your ORCID record, and for how long they can have that permission. You can also choose to revoke any permission that you already have granted. We strongly encourage you to grant long-lasting permissions that enable auto-update so you can benefit from automated and trusted updates to your ORCID record - no need to enter information yourself.

Note: Not every organization which requests long-lasting permissions supports auto-updates. If you are uncertain as to whether your trusted organization supports auto-updates, check their help documents or contact us for assistance.

Import works using BibTeX

Using the BibTeX import tool, you can import your research works from systems that have not yet built a connection with ORCID. We test our import tool with BibTeX generated from standard BibTeX providers, including Google Scholar Citations. For more information on how to export your Google Scholar citations to a BibTeX file, please see Google Scholar Citations help.

You will be listed as the source for works added using the BibTeX import tool, and you can manually edit these works after you have imported them.

To import a list of works saved in a BibTeX file into the Works section of your ORCID record:

1. Start from the Works section, go to "Add works", then select "Import BibTeX".

https://support.orcid.org/hc/en-us/articles/360006894794

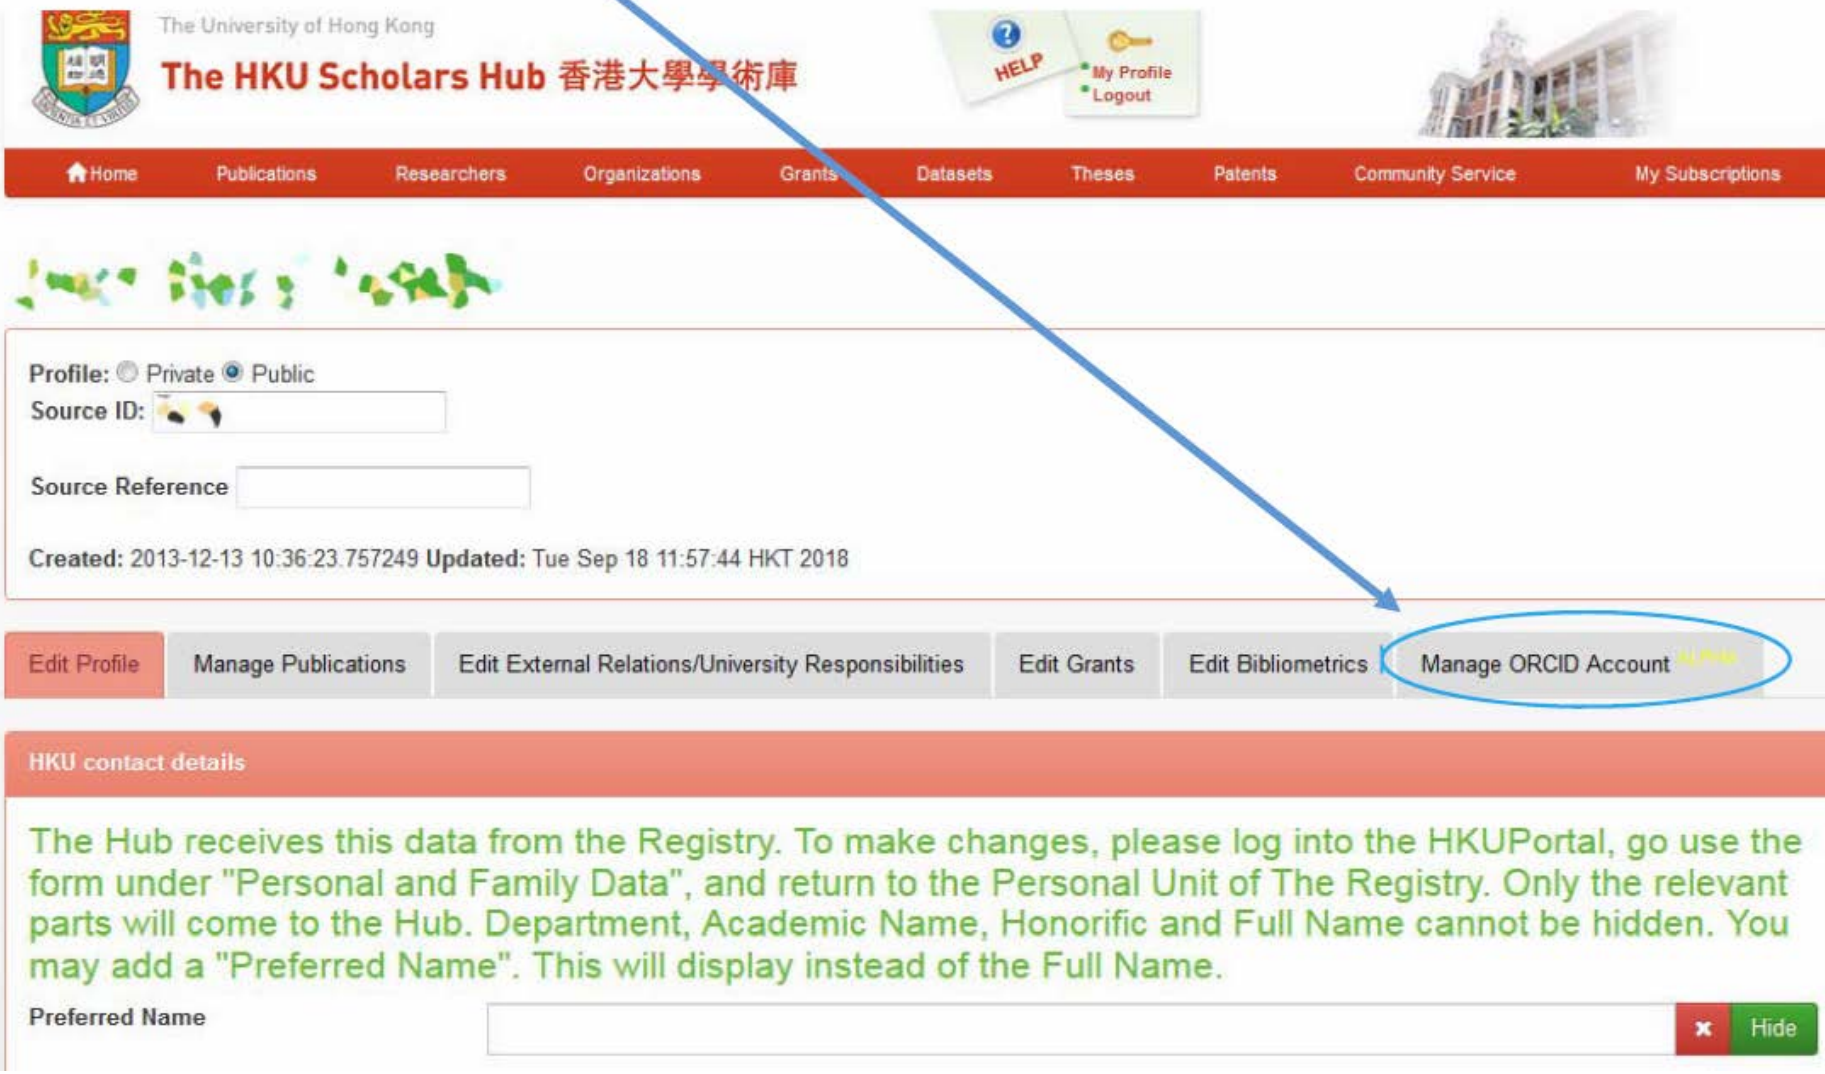
To populate publications from HKU Scholars Hub to ORCID

Login with your HKU Portal account:

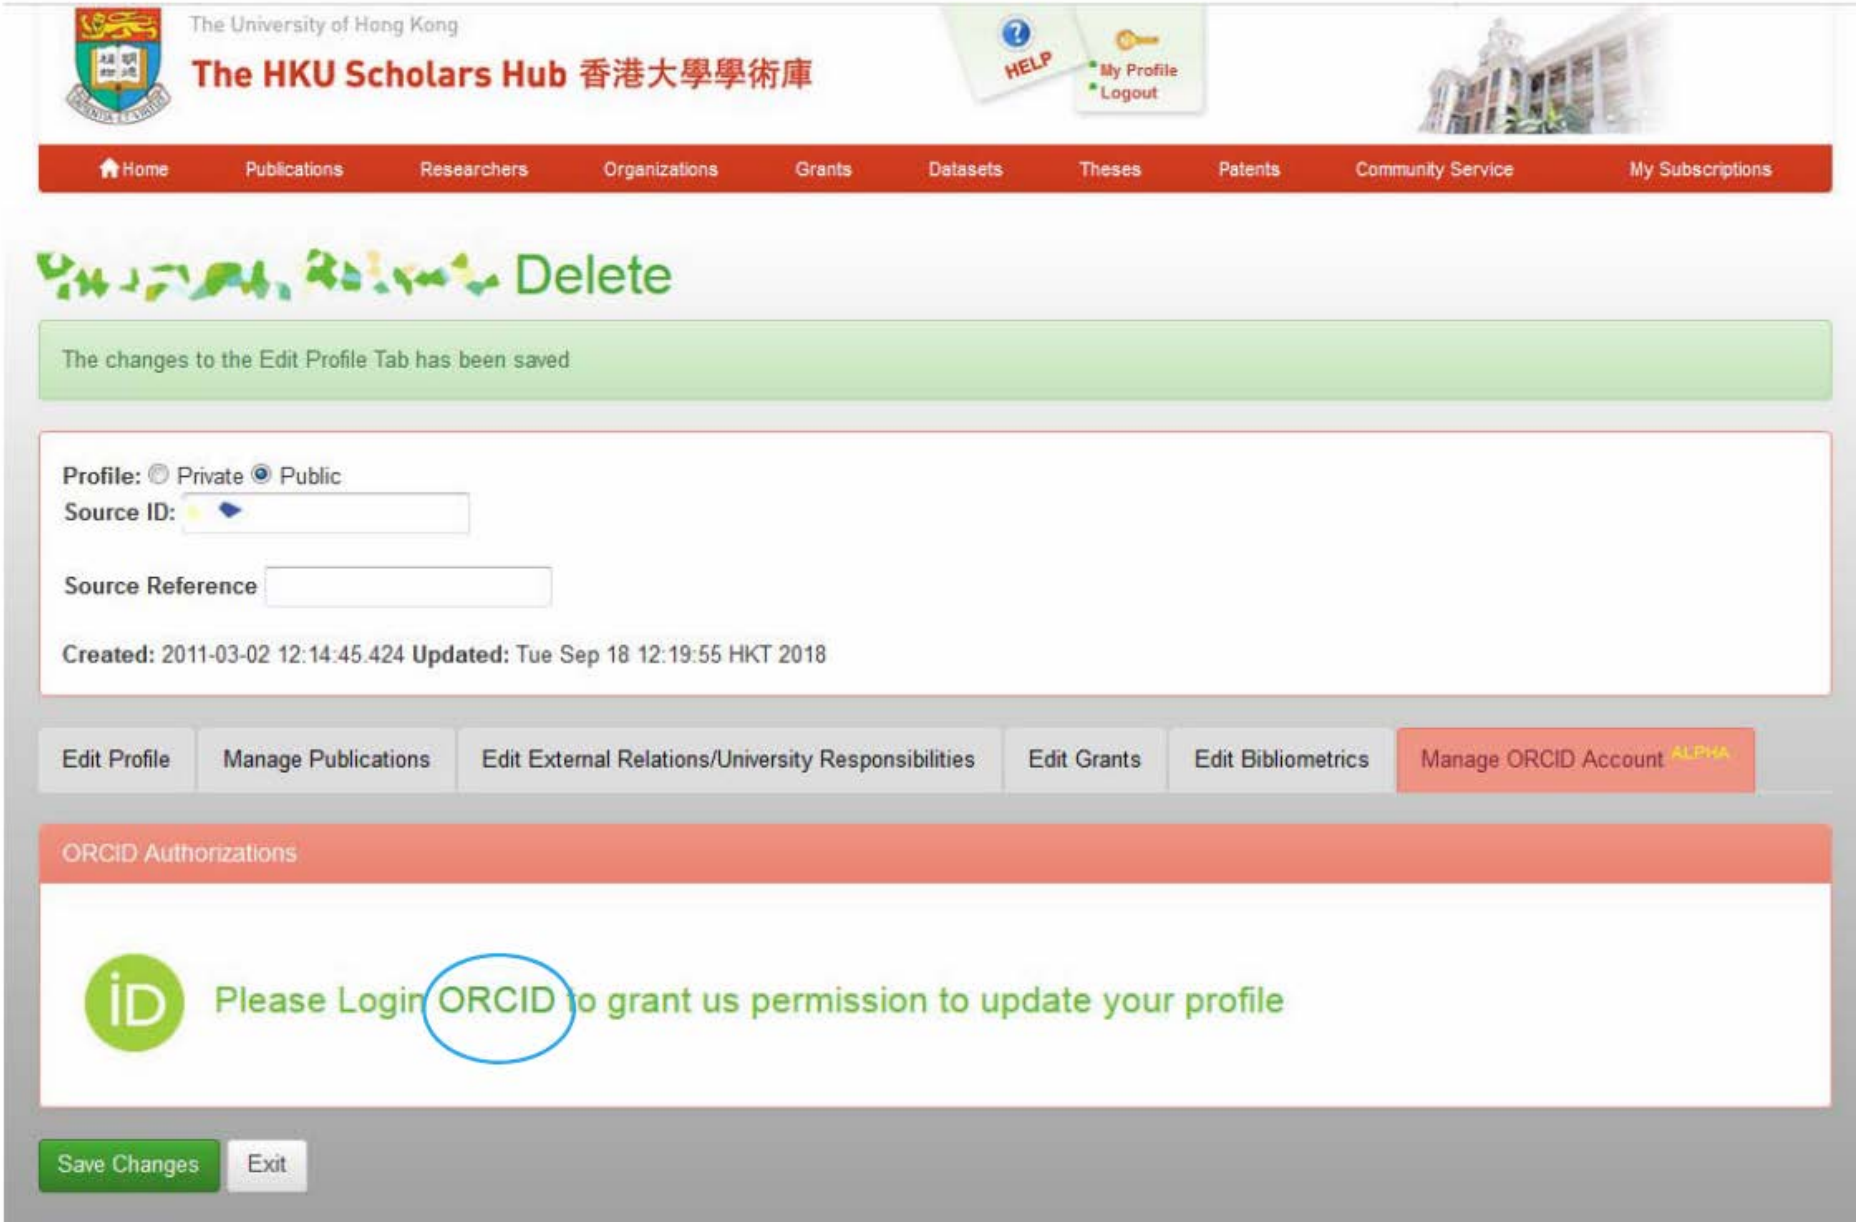
http://hub.hku.hk/orcid/Populate%20publications%20to%20ORCID%20201809.pdf

After login > Click "**Edit Researcher Page**"

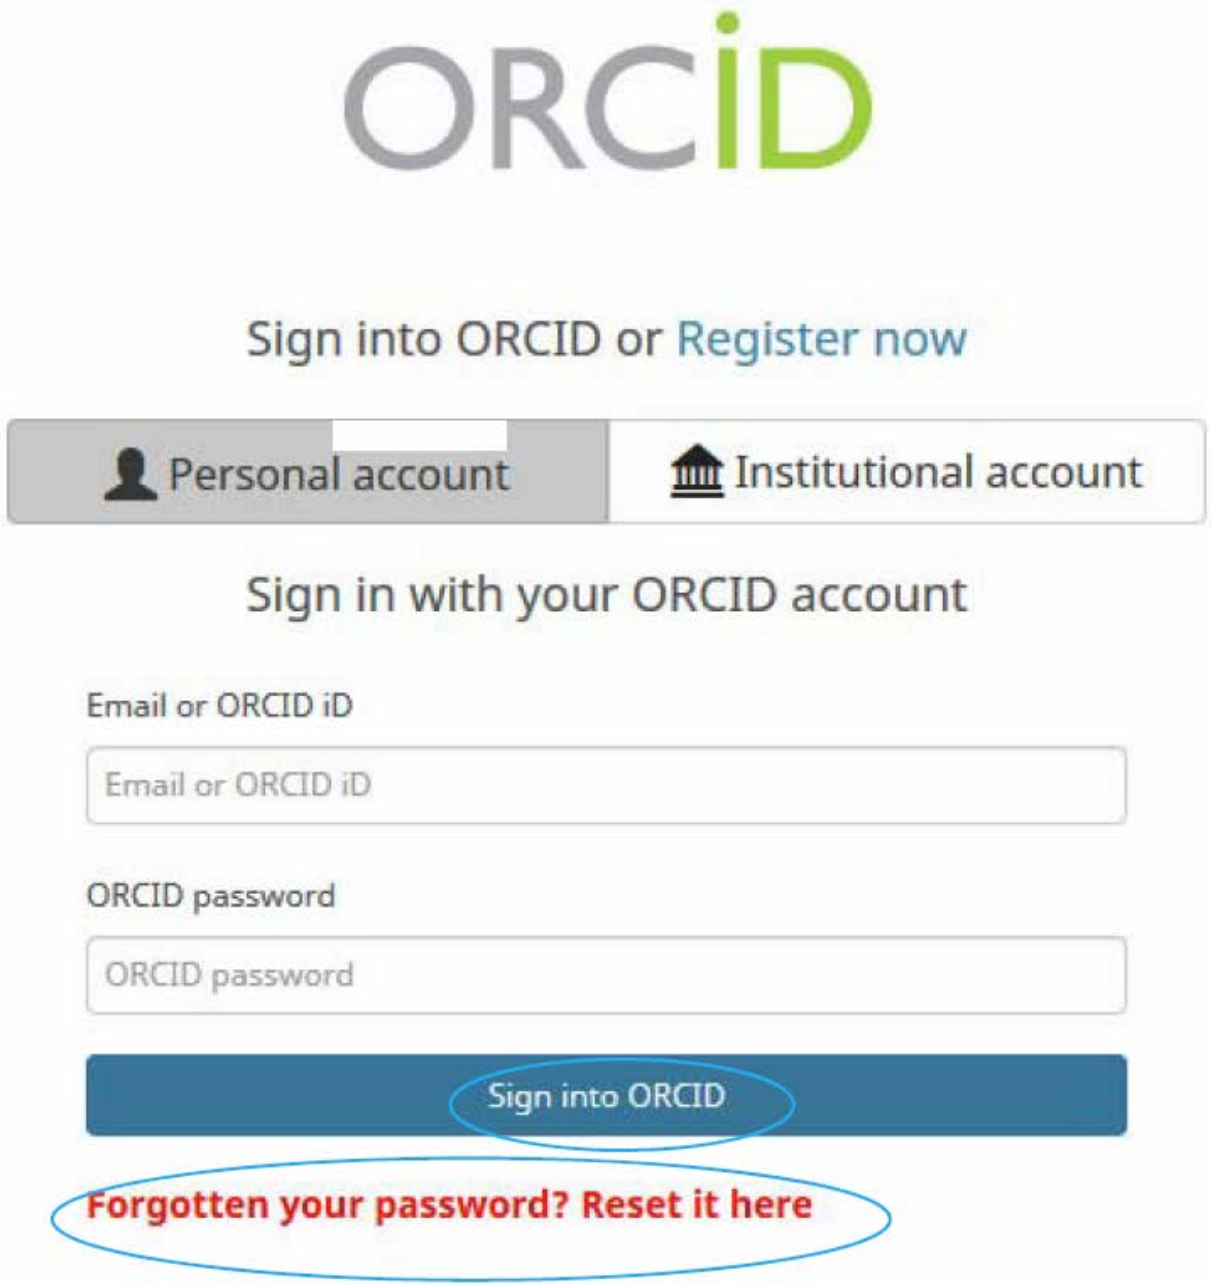
Click "**Manage ORCID Account**"



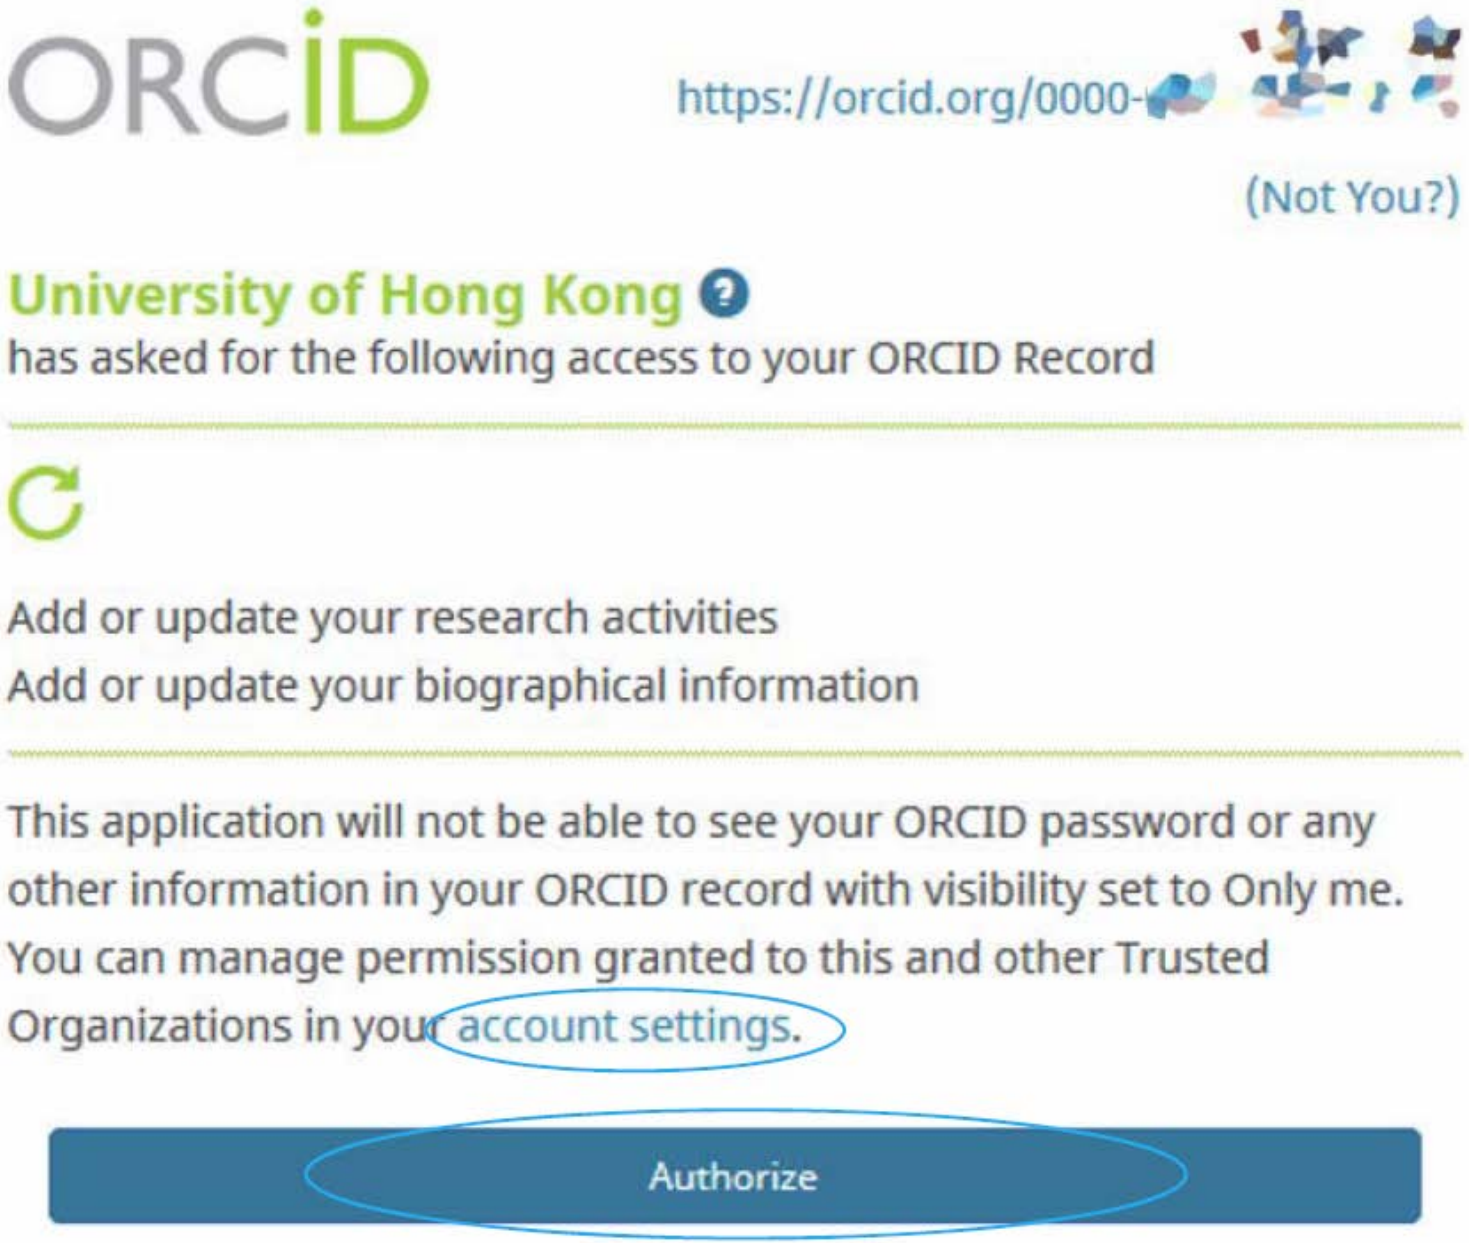
Click Login "**ORCID**" to grant us permission to update your profile.



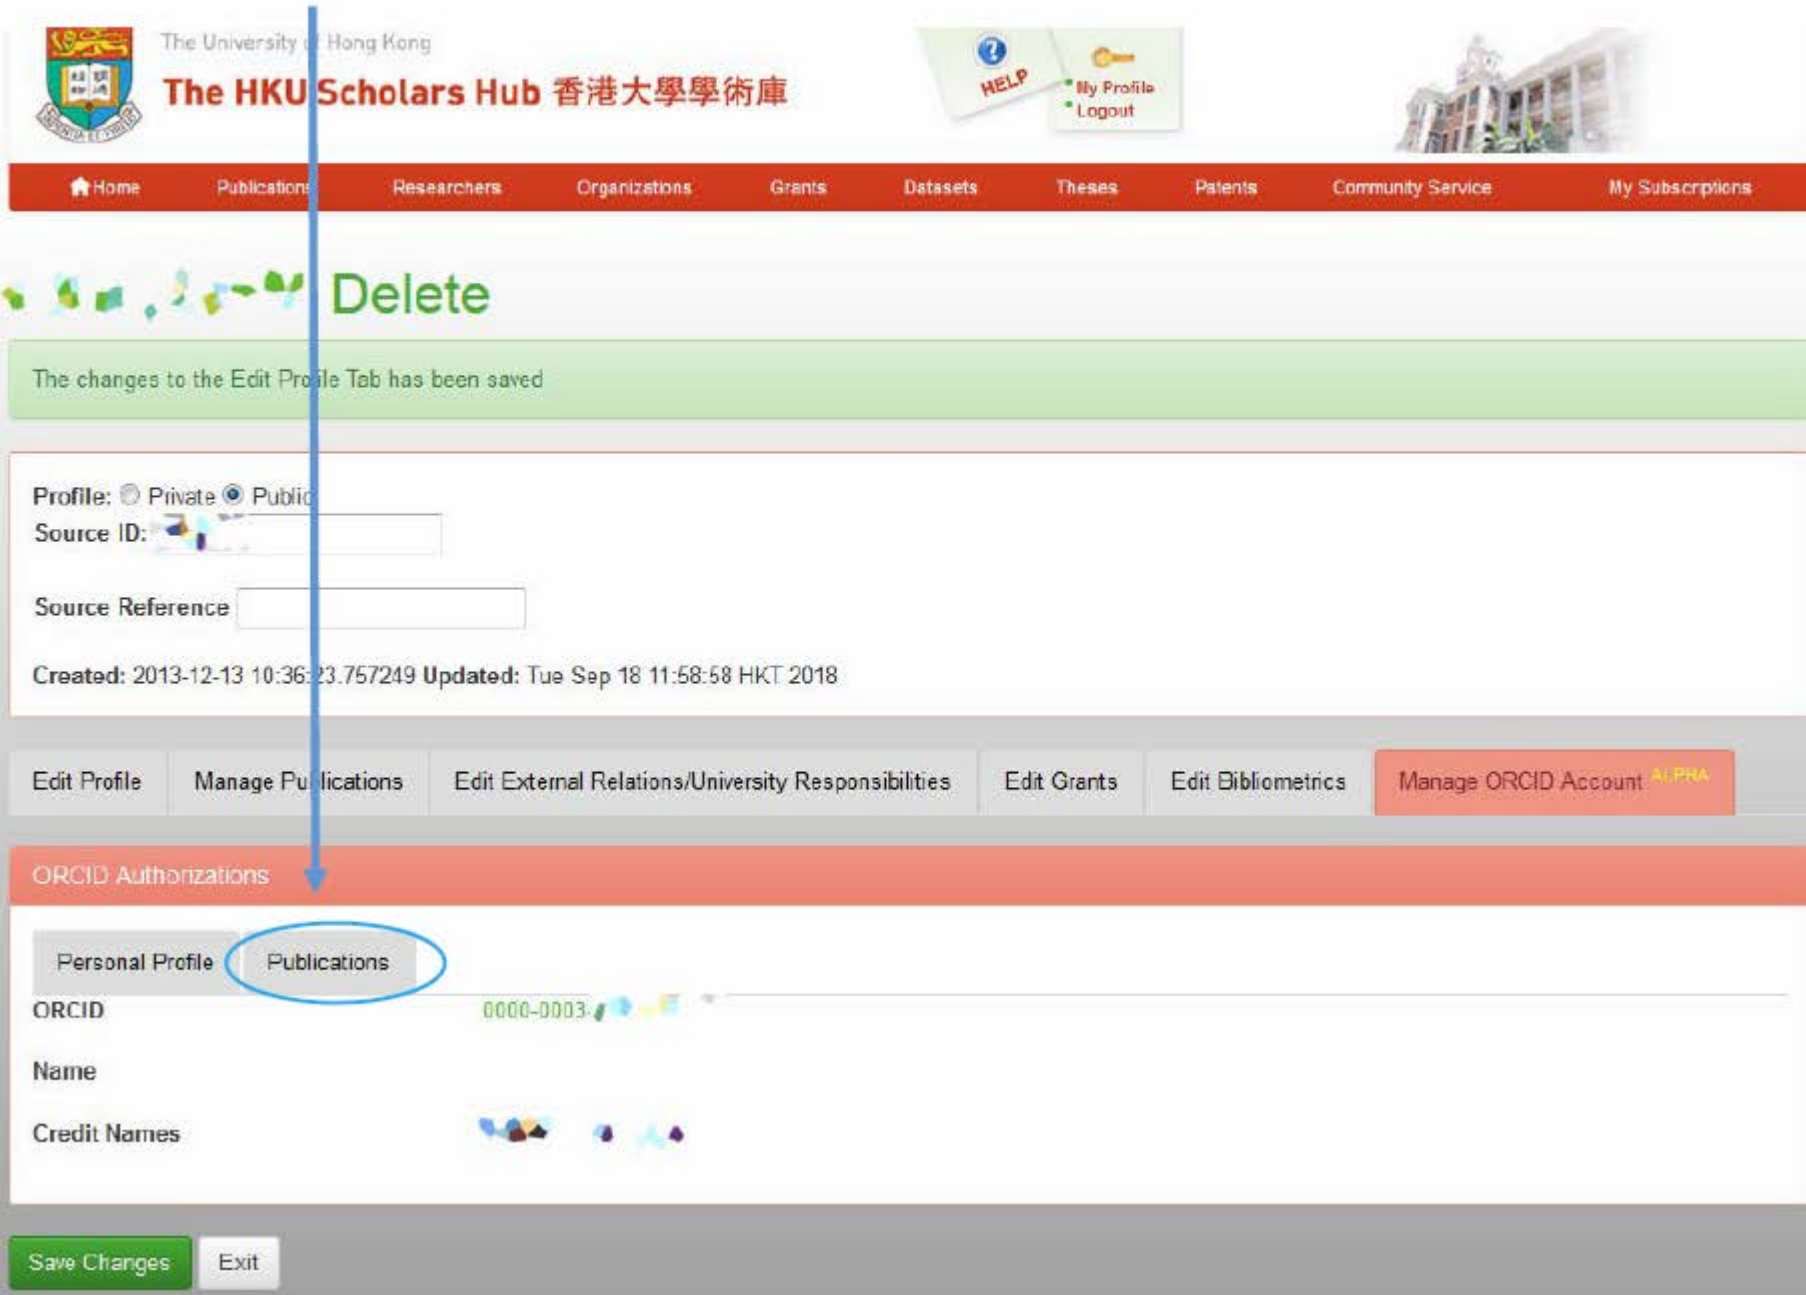
Sign into ORCID with your account or click **Forgotten your password> Reset it here** to reset your password.



Follow the instructions to **authorize** Scholars Hub to update your ORCID records. You may manage permission granted to Scholars Hub in your account settings.

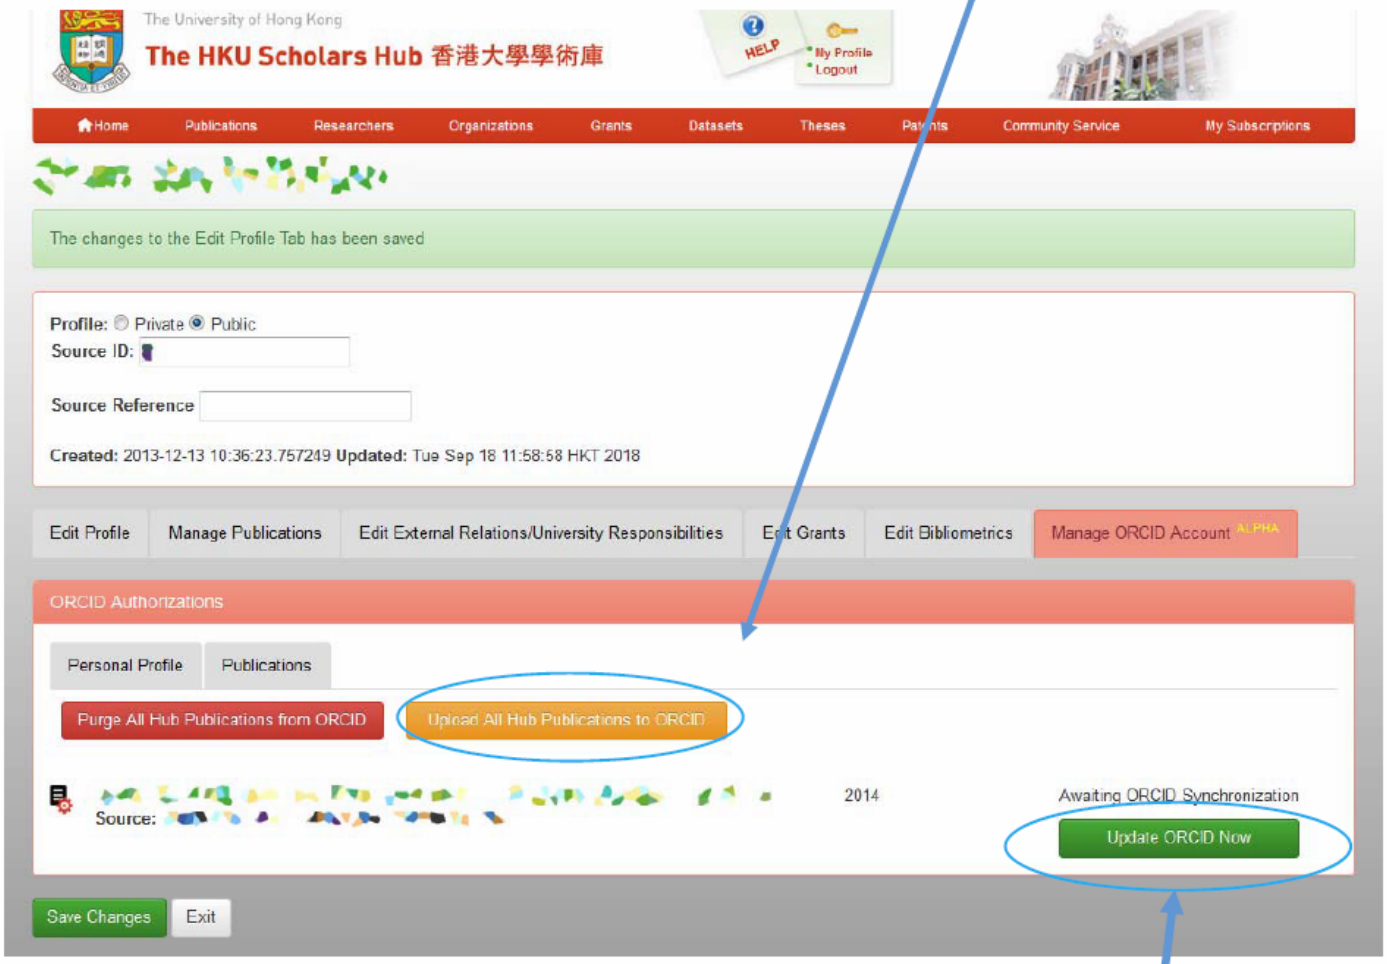


After the authorization has been done, you may go back to your Hub page > Manage ORCID Account > **Publications**



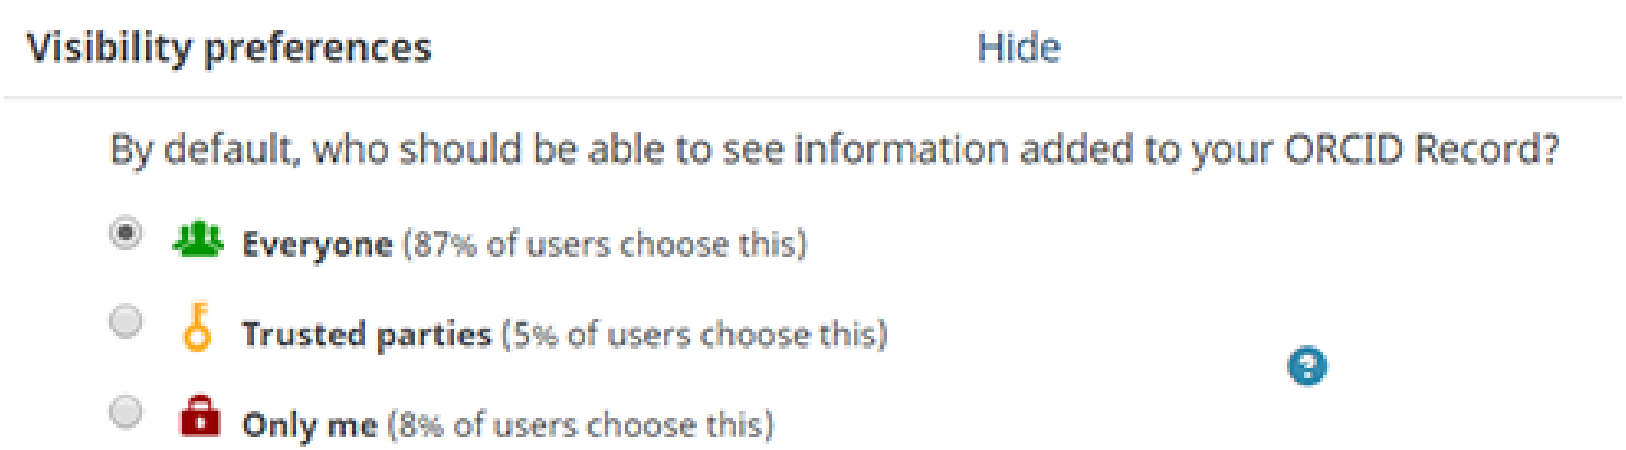
If there is no publication records existed in your ORCID, you may click "**Update All Hub Publications to ORCID**" to populate your publication records to your ORCID profile.

Please note if you already have publication records in ORCID profile, the system can only dedup records with DOI. This action will create duplicated records for those without DOI in your ORCID profile that you might have to delete those records one by one at ORCID afterwards.



Or you may click "Update ORCID Now" to select and populate the publications one by one.

To edit your ORCID profile visibility settings



Changing the default visibility preferences in your account settings will not overwrite the visibility level of any existing items on your record. To change the visibility of individual items in your record, use the visibility selector next to each item.
